[My LinkedIn](#) | [My GitHub](#)

Junior software developer with experience in modern web technologies and collaborative projects. Completed [CodeYourFuture](#) programme and studying Computing(BTEC National Diploma). Aspiring software engineer focused on writing clean, reliable code and strong problem-solving.

WORK EXPERIENCE

Screenshare UK

Volunteer Technical Support

London

Oct 2024 - Present

- Refurbish and securely wipe 5-10 donated devices per month (100+ total), reinstalling operating systems to restore reliable performance.
- Troubleshoot hardware and software issues to extend device lifespan by an estimated 2-3 years.
- Support low income individuals by preparing devices for education, job applications and everyday digital access.
- Contribute to reducing e-waste while collaborating with volunteers.

PROJECT/S

PlanYourFuture - Full-Stack Development Planner

[Project - Github Link](#) | [Project - Live Link](#)

- Built a full-stack [Project](#) using React, Node.js, Express, PostgreSQL and Docker to help users set, track and share goals with mentors.
- Developed secure user authentication, CRUD functionality for goals and tasks, a mentor feedback system and a personalised dashboard.
- Consumed and built RESTful APIs, applied OOP principles, wrote SQL queries and collaborated in an agile team workflow.
- Practised version control and testing strategies, and deployed a live version visible on GitHub Pages/Coolify.

CollaboratorBoard - Real Time Collaborative Whiteboard

[Project - Github link](#) | [Project - Live Link](#)

- Built a real-time collaborative whiteboard using Node.js, Express, Socket.io and JS enabling multiple users to draw and interact simultaneously.
- Implemented WebSocket communication using Socket.io to handle live updates between client and server.
- Designed backend routes and managed asynchronous event handling, resolving race condition issues.
- Applied version control and agile collaboration practices throughout development.
